Threaded Recessed Sprinkler Escutcheon

The recessed canopy has been widely accepted as the preferred method of finished sprinkler head installation. This type of canopy is one of the most aesthetically pleasing by making the sprinkler less obtrusive. FPPI's threaded recessed canopies are available in white or chrome. The retainer features a threaded outer edge for fine adjustment & optimal hold of the skirt or outer ring.

Coverage Plate for Recessed Canopy

When added to the recessed canopy, the coverage plate increases the overall coverage of the recessed canopy flange from approximately 2⅞" to 5" OD. Use when the hole in ceiling material is oversized to meet new requirement for earthquake standards.

Part No.	Description		in	Pack Qty.
